

To: The President and CEO of CealDoctor:

I thought I should drop off a letter of recommendation for your product after using it in my 2002 Camry.

I am a registered Professional Engineer and have worked in the automotive business in several positions over the last 33 years.

As the distributor's representative in the service area we looked at many ways to improve the life of our engines. Lubricants were used extensively to extend the life of the engine along with more oil change intervals.

After many disappointments and claims of improvements, I decided to try CealDoctor. From the moment I put in the recommended amount of CealDoctor in my vehicle I was amazed at the way the vehicle ran and sounded. The normal noise and vibration I expected to encounter seems to have disappeared as soon as I drove it after adding CealDoctor. Over the last couple of months I have also noticed an improvement in my gas consumption.

This product appears to truly be a Self-Healing engine treatment. I plan to continue using it as well as adding it to some of my other engine powered transportation.

This is a product that I would recommend to anyone that wants to improve their engine performance and improve their fuel consumption.

Yours Truly,

Ilario Galano P. Eng.
Automotive Consultant
